

MULTI-SKILLED MAINTENANCE TECHNICIAN

We have an exciting opportunity for a Multi-Skilled Maintenance Technician to join our Engineering Team. Responsible for carrying out maintenance activities relating to Blachford UK's manufacturing processes, machinery, plant and site, along with assisting with tooling repair and modification when required.

Key Duties & Responsibilities:

- Carry out day-to-day Pneumatics/Mechanical and Electrical PPM activities on machinery, based on the monthly schedule.
- Ensure rapid response on all machinery breakdowns, fault finding the cause and implement rectification.
- Capture and record all maintenance work completed.
- Capture and record all required KPI information.
- Prepare purchase requisitions for low critical spares.
- Liaise with Ancillaries Department re: maintenance activities.
- Undertake tasks/activities as and when required by the Engineering Manager.
- Work alongside external contractors as and when required
- Assist in building maintenance activities, and project and process activities as and when required.
- Attend training courses relevant to processes and machinery.

This job description is not an exhaustive list of responsibilities and you may well be asked to perform other tasks as and when required.

Person Specification:

- Proven experience within a similar role in a manufacturing environment, including mechanical/pneumatics/electrical experience.
- Proven experience of working with manufacturing equipment.
- Ability to work well in a team environment.
- Ability to work under pressure, and prioritize effectively to support own workload and that of the team.
- Willingness to learn new skills.

Professional Qualifications/Education:

- 18th Edition Electrical qualification.
- PLC fault finding experience.
- Ability to read and interpret electrical schematics, pneumatics circuit diagrams and engineering drawings.
- MIG Welding (advantageous, not essential)
- Computer literate/knowledge of Microsoft Office - Outlook, Excel and Word.
